

3000 STATIONARY FRAME MOUNT

SMB

When weight and cost are prime considerations Fontaine® Bracket Stationary Mount Fifth Wheels are ready for service. These safe, strong, low weight models are recommended for applications where axle weight, bridge length and kingpin settings remain constant.

The SMB mounting brackets are welded directly to the mounting base on your vehicle to save weight and cut costs.

The 3000 top plate features new greaseless bracket liners that fit on the APB plate to give you consistent lubrication, reduce wear and cut maintenance costs. The top plate is manufactured using ductile iron for increased strength.

Stationary Frame Mount Fifth Wheels (SMB)

FIFTH WHEEL MODEL NUMBER	MOUNTING HEIGHT	3000 WEIGHT
SL3SMB5875	5 ⁷ / ₈ "	241
SL3SMB6875	6 ⁷ / ₈ "	247
SL3SMB7875	7 ⁷ / ₈ "	253

3000 Series Top Plate

The economical 3000 Series does not feature the No-Slack® II technology, but it does give you several advantages over ordinary fifth wheels. The locking mechanism features a patented kingpin height sensor that acts as a safety trigger. If the kingpin enters at the wrong height it will not allow the fifth wheel to close. If you have no contact ... you have no couple.

This important safety feature virtually eliminates false trailer couplings to prevent dangerous high-hitching. Approximate weight: 215 lbs.

3000 SERIES

Approved to
94/20/EC.
Directive:
D-Value 150
U-Value 20
