Fontaine Ultra LT

Light in weight... strong in performance

50,000 lb vertical load

150,000 lb drawbar pull rating

Rated for on-highway use only, including tankers

- This formed steel top plate coupled with our sleek new mount delivers the lightest-weight fifth wheel slider system on the market today
- Lighter than aluminum fifth wheel slider systems—with the durability and cost-effectiveness of steel construction
- Weight savings of up to 100 lbs or more over competitive products—helps fleets offset heavy 2010 emission system components
- Features a patented lock design that eliminates the possibility of false trailer couplings to prevent dangerous high hitching
- Patent pending automatic secondary lock provides added safety and security
- Simple lock design is easy to rebuild for lower maintenance costs
- Visual lock indicator lets the driver know the lock status at a glance
- Improved fuel economy plus low up-charge makes the Fontaine Ultra LT very attractive to weight-sensitive, cost-conscious fleets
- The weight dividend varies based on the type of fleet:
 - Can range from \$2 per pound for truckload carriers
 - Up to \$12 per pound for bulk carriers
- Optional air actuation with in-cab air release (operates only when parking brake is engaged)
- Your choice of inboard and outboard sliding mounts, or stationary mount
